DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 9, 11 and 12, drawn to a semiconductor device, classified in class 257, subclass 336.
 - II. Claims 1-8 and 10, drawn to a method of making that device, classified in class 438, subclass 151.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the device of invention I could be created such that the layered insulating film has a width greater than the width of the gate electrode and smaller than the width of the semiconductor film by either of two materially different processes: formation of two distinct insulating films that may be etched at different rates to create the desired geometry; or by selectively depositing a second layer on top of a first layer to create the desired geometry without the use of etching.
